Exploring New and Emerging Assistive Technology with Gerry Kennedy

The National Disability Coordination Program, in partnership with GippsTAFE, invites you to professional development on “Exploring New and Emerging Assistive Technology with Gerry Kennedy”. Assistive technologies are utilised within education and employment to improve access and participation for people with a range of learning difficulties and/or disabilities.

This training revises and builds on the AccessApps professional development delivered in this region last year. The training will incorporate the updated EduApps - portable technology that provides access to more than 80 assistive software programs anywhere, anytime, with specific applications for teachers and learners. New and other technology such as reading pens, intellipens, the “My Study Bar” software and much more will be demonstrated with a focus to raising awareness of the benefits of Assistive technologies for both teachers and learners. “Exploring New and Emerging Assistive Technology” is offered to educators, students, student teachers, youth and community workers, parents and employers.

Presenter: Gerry Kennedy is a trained teacher with many years experience promoting and delivering effective information and communication technology (ICT) solutions. Specialising in adaptive technologies, Gerry provides practical and useful information to assist those who require effective and sustainable ICT. Gerry presents the technology with a view to how it can improve participation for students with a range of learning difficulties and/or disabilities.

Session

Date: Tuesday 13 July 2010
Time: 1pm — 4pm
Venue: GippsTAFE - Yallourn Campus
Monash Road, Newborough
